SUMMARY

Back end engineer with 5+ years of hands-on work on relational databases (MySQL, PostgreSQL) and data-heavy back ends. For the last 3 years at JV DIAMOND I worked daily against a production MySQL database with 3.8M users and 500K+ agents in 20+ level trees, tuning slow queries, batching large reads and using constraints and row locks so retried jobs never wrote data twice. I also took shifts in the team's IT support rotation: reproducing reported issues, tracing the root cause through logs and data with no checklist to follow, and shipping the fix. Fluent in Mandarin and English; used to explaining root causes to non-engineers. My main language is Ruby; I pick up new stacks quickly with AI-assisted development (Claude Code) and am ready to work in C#/.NET and PowerShell.

SKILLS

Databases / SQL	MySQL (3 years in production on PlanetScale), PostgreSQL, Redis, AWS Redshift; slow-query tuning, index use, N+1 fixes, batched queries on large tables, unique constraints / upserts / row locks for safe retries, SQL data checks
Data / ETL	Scheduled scraping and ingestion (Selenium, Watir, Nokogiri, headless Chrome), data cleaning, daily price history, CSV / PDF export, AWS Lambda / Kinesis / Redshift reporting
Back End	Ruby, Ruby on Rails 6/7, Grape (REST API), RSwag / OpenAPI, Pundit
Background Jobs	Sidekiq, sidekiq-cron, sidekiq-scheduler, whenever
Cloud / Tools	Linux, command line, Git, GitHub, GitLab CI, Jira, AWS S3, AWS Lambda, AWS Redshift, AWS Kinesis, AWS QuickSight
Testing / Debugging	RSpec, RuboCop, Bullet
AI Workflow	Claude Code (custom skills, agents and rules for team workflows)

EXPERIENCE

JV DIAMOND TECHNOLOGY LIMITED — Back End Developer

Aug 2023 – Jul 2026

Feature development for a multi-brand online gaming platform running on PlanetScale (MySQL)

Ruby 3.1 · Rails 7.0 · Grape · MySQL / PlanetScale · Sidekiq · Redis · RSwag

- Took regular shifts in the team's IT support rotation: triaged reported issues and bugs, reproduced them, traced the root cause through logs and data, and shipped fixes
- Worked daily against the production MySQL database on PlanetScale: built features on large agent / user trees (500K+ agents, 3.8M users, 20+ levels deep), writing batched SQL queries and eager loading to keep them fast
- Used database-level safeguards (unique constraints, upserts, row locks) so background job retries never paid out twice
- Integrated third-party game provider APIs by reading unfamiliar provider docs and code, supporting both single-wallet and transfer-wallet models
- Built internal tooling to cut repetitive work: Claude Code workflows for Jira ticket kickoff, auto-generated MR descriptions, Jira status sync, integration scaffolding and code review rules
- Built player-facing and admin REST APIs (Pundit authorization), documented with Grape + RSwag

5xRuby Co., Ltd. — Back End Developer

Jul 2022 – Jul 2023

Rails 7 · PostgreSQL · Hotwire · ViewComponent · Tailwind · Sidekiq · Pundit · RSpec

PAKA Time Clock System — Web + mobile app API · core developer

- Built the mobile clock-in API: clock in/out, WiFi-based clock-in settings, profile, password change

- Built missed-punch appeal, resignation and reviewer assignment flows
- Shift calendar with FullCalendar; scheduled import of Taiwan public holidays with whenever
- Integrated the Taiwan company registry (GCIS) API to look up companies by tax ID
- Wrote 32 RSpec test files covering APIs, Pundit policies, feature flows and external services

BASE – 5xCampus Course Platform base.5xcampus.com

- Announcement system and admin order search; fixed N+1 queries with Bullet and improved Lighthouse scores

Beseye Back End Developer — Sep 2021 – Jul 2022

Back end for an AI video analytics edge server

Rails 6 · MySQL · Redis · ffmpeg · QuickSight · Redshift · Lambda

- Built the back-end logic that matched AI body keypoints against on-screen regions (ROI) for 4 solutions: school wall-climbing detection, hospital surgical gown monitoring, exhibition hall people counting, factory worker gesture detection
- Presented analytics in embedded AWS QuickSight dashboards backed by Redshift, with AWS Lambda for data processing
- Core developer of the SOP compliance module and its rule engine (ROI, dwell time, overtime alerts, wrong-hand detection); report API with CSV export

Maker Tech Back End Developer — Nov 2020 – Sep 2021

Buyorbuild PC build e-commerce platform

- Built APIs with the front end team; Backblaze image uploads with Active Storage; Telegram bot notifications via sidekiq-scheduler

TommyDeals Shopping deals platform

- Built scrapers for Amazon and Newegg (search pages → product pages) with Selenium, Watir and Nokogiri; cleaned and stored product data, updated prices and kept a daily price history; scheduled with whenever / Sidekiq; proxy rotation with health checks and captcha solving via a third-party service; Facebook API auto-posting

SIDE PROJECTS

WCAG Pulse AI-assisted (Claude Code) — Dec 2025 – Sep 2026

Website accessibility scanning SaaS built with AI-assisted development (Claude Code) · 339 commits

Rails 7.2 · PostgreSQL · Sidekiq · Ferrum · axe-core · Stripe

- Site crawler that discovers pages from sitemaps first, then follows on-page links, with a max-page limit
- Renders each page in headless Chrome (Ferrum) with resource blocking, injects axe-core and maps violations to WCAG 2.1 criteria
- Scans pages in parallel; background scans and recurring jobs with Sidekiq / sidekiq-scheduler
- Multi-tenant organizations, Stripe subscriptions and webhooks, CSV / PDF reports, Slack and Teams notifications

OTHER

ASTRO Camp Full-Stack Bootcamp — Aug 2020 – Nov 2020

- Built a SoundCloud-style music platform in a team of 5; owned podcasts, Shrine file upload, AWS S3 and site-wide search (GitHub)
- Completed the 12th iThome Ironman Challenge with a Ruby on Rails article series

EARLIER CAREER & EDUCATION

Townview Australia · Rope Access Technician — Jul 2018 – Aug 2019

GAMIN Distributor · Accountant — Apr 2015 – Aug 2016

Citibank Taiwan · Personal Banking Financial Advisor — Sep 2014 – Mar 2015

Nanhua University · M.S. in Financial Management — 2012 – 2014
